SUMMARY

Aspiring Backend Engineer with a foundation in Go, Python, and Node.js, built through personal projects and university work. Passionate about designing clean, reliable APIs and web services, and eager to grow in building scalable backend systems. A fast learner who enjoys solving real-world problems through code and is looking to contribute meaningfully to a collaborative engineering environment.

EXPERIENCE

Backend Developer — gachpala.com (Co-Founder)

2025 – Present | Dhaka, Bangladesh | gachpala.com

- Helped build and maintain the backend of a live e-commerce platform using Go.
- Worked on features like authentication, orders, payments, and search.
- Used Redis, MySQL, Docker, and third-party APIs (courier, FCM) in the process.
- Set up CI/CD pipelines and containerized services with Docker.

Researcher — SSK Innovation Lab (SSKIL)

Feb 2024 – Jul 2025 | Remote, Bangladesh

- Contributed to IoT and embedded systems projects as part of a small research team.
- Involved in building a model rocket control system and an earthquake detection device.

PROJECTS

Gachpala.com — E-commerce Marketplace *Go, Chi, MySQL, Redis, JWT, Docker*

- Live multi-vendor platform with auth, orders, payments, and courier integration.
- Deployed with Docker and CI/CD.

Smart-IMS — Inventory Management *Go, MySQL, OAuth2, Chart.js*

- Multi-warehouse inventory system with role-based access (Admin, Manager, Worker).
- Includes low-stock alerts and a basic analytics dashboard.

Inventory & Order Microservice *Go, Gin, GORM, MySQL*

- Layered microservice with transactional order processing and rollback safety.

Earthquake Detection System *Go, ESP32, Leaflet.js, MySQL*

- IoT platform that reads ESP32 sensor data, calculates magnitude, and shows live maps.

Model Rocket Flight Computer *ESP32, C++, PID Control*

- Thrust vector control system with 200Hz PID loop and custom PCB.

Diamond Price Analysis *Python, Pandas, Scikit-learn*

- EDA and regression model on a 54K dataset, achieving ~85–90% R² score.

TECHNICAL SKILLS

Languages: Go, Python, JavaScript, C

Frameworks: Chi, Gin, Fast API, Node.js, React, Tailwind CSS

Databases: MySQL, PostgreSQL, Redis, MongoDB, Firebase

Tools: Git, Docker, Linux, Postman, CI/CD

Concepts: REST APIs, JWT, OAuth2, RBAC, Caching, Microservices

Familiar With: Java, C++ (Embedded/Arduino)

EDUCATION

B.Sc. in Computer Science & Engineering

Daffodil International University, Dhaka | Expected 2027

ACHIEVEMENTS

- ICPC Dhaka Regional Contestant
- Hackathon Finalist — Takeoff (75th), Algorithm (89th)
- Active competitive programmer on Code forces, Hacker Rank, and Bee crowd

CERTIFICATIONS

Go Basic (Hacker Rank) · Python (Kaggle) · AWS Cloud Computing (AWS Academy) · Go Intermediate (Code Chef)

LANGUAGES

Bangla — Native **English** — Fluent
